PROFESSIONAL SUMMARY

Full-stack software engineer with hands-on experience building scalable web applications using Next.js, React.js, NestJS, and Node.js/Express. Skilled in REST API design, authentication, and third-party integrations. Experienced with PostgreSQL, MongoDB, MySQL, Docker, Redis, and Google Cloud Platform. Focused on clean architecture, maintainable code, and collaborative delivery with Git and GitHub.

TECHNICAL SKILLS

- Languages JavaScript (ES6+), TypeScript, HTML5, CSS3
- Frontend React.js, Next.js, Tailwind CSS
- Backend Node.js, NestJS, Express.js, RESTful APIs
- Databases PostgreSQL, MongoDB, MySQL
- Cloud & DevOps Docker, Redis, Google Cloud Platform, Vercel
- Tools Git, GitHub, Postman, VS Code

PROFESSIONAL EXPERIENCE

SOFTWARE ENGINEER

2023 – 2026 | REMOTE

- Designed and developed scalable web and mobile applications using JavaScript, TypeScript, React.js, Next.js, and Tailwind CSS.
- Built robust backend services and RESTful APIs using Node.js, NestJS, and Express.js.
- Designed and managed databases using Prisma, PostgreSQL, MongoDB, and MySQL.
- Implemented authentication, third-party integrations, reusable components, and scalable application architecture.
- Optimized application performance, resolved complex technical issues, and maintained high-quality, production-ready code.
- Worked with Docker, Redis, Google Cloud Platform, and Vercel for development, deployment, and infrastructure.
- Used Git, GitHub, Postman, and VS Code for version control, API testing, collaboration, and development.

PROJECTS

TALKSPRESSO

talkspresso.com

1. **Tech:** Next.js, NestJS, Docker, Redis, PostgreSQL

- Built creator-platform features and secure REST APIs, including payment integration for transaction workflows.
- Developed responsive Next.js interfaces and used Redis to optimize frequently accessed data paths.
- Supported Dockerized services and PostgreSQL for stable development and deployment workflows.

Cybrology

cybrology.com

1. **Tech:** Next.js, NestJS, Docker, Redis, PostgreSQL, Google Cloud Platform

- Contributed to a social media analytics platform by developing backend APIs and integrating third-party services.
- Optimized performance and helped maintain a scalable NestJS backend with PostgreSQL, Redis, and Docker.
- Built responsive Next.js frontend components for consistent cross-device user experiences.

KEYHOLE

keyhole.co

1. **Tech:** Next.js, NestJS, Docker, Redis, PostgreSQL

- Developed scalable NestJS REST APIs and secure authentication / authorization for core platform features.
- Built a responsive Next.js frontend and used Redis caching to improve response times for frequent data access.
- Containerized services with Docker, worked with PostgreSQL, and deployed on Google Cloud Platform using clean architecture practices.

EDUCATION

Bachelor of Software Engineering — Virtual University of Pakistan

ICS (Computer Science) — KIPS College

CERTIFICATIONS

Full Stack Web Development — IDEO College of Technology

CCNAv7: Introduction to Networks — Cisco Networking Academy

STRENGTHS

- Full-Stack Development → strong overall positioning
- REST API Design → directly relevant to your backend skills
- Database Design → supports PostgreSQL/MongoDB/MySQL
- Software Architecture → appropriate for a senior-level profile
- Cloud Deployment → aligns with Docker, GCP, Vercel
- Performance Optimization → gives your profile a stronger senior-engineer feel
- Clean Code → professional engineering practice
- Team Collaboration → important for overseas roles
